The First Call For Papers

Our lifestyle is more and more digital everyday. From the time we get up in the morning until the time we go back to bed, we are involved with all kinds of digital things, e.g. digital alarm clock, digital home, digital communication systems, etc. Virtual life starts with digital convergence in communications, followed by user's friendly software and services, search for information on the web, personal diary on the net or blogging, e-Business and e-Commerce, digital home and e-Entertainment, e-Learning and m-Learning, e-News and e-Book, digital library and databases, and e-Government and e-Services. The virtual lifestyle is supported by the availability of all kinds of "e", from e-Auction, e-Banking, e-Commerce, and so on up to e-Society.

iNCEB is an international conference and provides a central forum for students, researchers, experts and developers to discuss various issues and developments in the broad field of e-Business and other related areas.

The objective of the conference is to bring together leading researchers and professionals from all over the globe and from many disciplines to exchange ideas and share research solutions to problems of e-business in our virtual world and to identify new issues and directions for future research and development work. For the 8th iNCEB conference, the list of topics includes the following:
